GP Foods: Technology Feeds Expansion

Garuda PolyFlex Foods Pvt. Ltd. is a Joint Venture between Garuda Foods, the food and beverage subsidiary of Indonesia-based Tudung Group, and PolyFlex, Rs. 200 crore luxury goods firm based in Bengaluru, India. GP Food's endeavor is to provide best in class innovative offerings in the food and beverage segment of India. To do this effectively and to expand their reach in the Indian market, they sought to automate Inventory Management at different levels. Find out how the company has leveraged Ramco ERP on Cloud to do that!

Ingredients Required to Succeed

The company needed a customized solution that followed the norms of the industry to handle their specific requirements:

- Inventory Management to manage different levels of activities
- Stock clearance based on the date of expiry of the products
- Integration with finance module to automate financial activities
- Easy to use software with simple yet effective interfaces that would require minimal training

Adding Spice to the Mixture

Ramco introduced new standards to implement a customized, state-of-the-art ERP system:

- FEFO (First Expiry First Out) was implemented to ensure that the system picked the product with earlier expiry date during the pack slip
- Resources were able to use the solution after just 10 days of hands-on training provided by Ramco

The Sweet Taste of Success

Having made a mark at Polyflex Enterprise, Ramco ERP on Cloud was the natural choice at Garuda Polyflex Foods. Some of the major benefits since implementing Ramco ERP on Cloud are:

- Robust inventory tracking that improves efficiency greatly
- Activity reporting in production to monitor various processes
- Status of each work order available whenever required
- Allocation made based on the expiry date of the products
