

HEVILIFT GROUP, AUSTRALASIA'S LEADING HELICOPTER & CHARTERER GETS A BEST-FIT SOLUTION FOR ALL ITS NEEDS

Problem

Hevilift operating a fleet of 52 fixed and rotary wing aircraft and helicopters in Australia, Papua New Guinea and South East Asia required a single unified system to integrate their maintenance operations in three main bases across 15+ countries.

Featured Solutions

- Ramco Maintenance & Engineering with Integrated HR and Finance Modules
- E-publications

Business Needs

- Diverse applications to be integrated into a single unified system
- Consolidated financials & reporting across the group
- Maximized resource utilization - Aircraft, manpower, material
- Systemized Warranty Tracking abilities
- Automated Engineering Change Management process

Engagement Model

On Premise | On Cloud

Domain experts | Change Management experts

Out-of-the-box | Large scale implementation

Ramco Solution

- Aviation-specific Finance and Accounting solutions consolidating country-wise financials and report books of accounts at group level (adding visibility)
- Integrated M&E, Supply Chain Management, MRO, Finance and Work Force Administration solution in turn maximizing the utilization of available resources
- Real-time Warranty Management solution assuring on-time claims recovery by tracking and sending alerts of critical parts
- Complete set of Engineering Change management modules ensuring automation of aircraft and component modifications

Key Business Benefits

- Single harmonized platform for multi company operations saving time and money
- Automated billing, financial closure and warranties
- Improved visibility of maintenance dues, parts availability and tracking with M& E solution
- Better management of skilled work force and project allocation with improved and end-to-end integration
- Ease of financial consolidations, on-time billing and financial closure
- Profitability analysis at aircraft and customer level
- Automated billing, financial closure and warranties
