Change Management experts

Out-of-the-box

Large scale implementation

Business Needs

- To integrate all the M&E, HRMS and finance functions within the organization
- The software should effectively manage:
 - Quotation handling, maintenance planning
 - Maintenance execution, configuration management
 - Supply chain logistics, cost tracking & invoicing
- The solution must be deployed in less than 3 months enabling the facility to become a profit centre at the earliest
- Integration requirement with Spec 2K vendors

Ramco Solution

- Ramco deployed the comprehensive Aviation Suite v5.6 materials including Aviation Finance and HR and the critical MRO Sales Modules
- The solution was offered via an on-premise delivery model with pre-built business process documents, pre-loaded industry standard codes and option settings ensuring only the best practices and standards are delivered

Results and Value add

- Enabled 100% effectiveness in tracking of engine parts right from disassembly to final assembly
- Provided the ability to track, control and manage costs more efficiently across assets and resources
- Solution also delivered better resource utilization and enhanced productivity, lowering cost of service to a great extent
