

Ramco Sys to offer blockchain and chatbots

TIMES NEWS NETWORK

Chennai: Ramco Systems is now offering blockchain for logistics, bots for HR systems and mixed reality along with its existing solutions.

With newly set up subsidiaries in Vietnam and Indonesia, the company is penetrating deeper into the Asia market particularly with its human capital management (HCM) product where it is looking to gain first mover advantage.

With 76% of the company's revenues coming from outside India, it is looking to tap into UK and Ireland with its human capital management product.

"We are seeing some green shoots in Europe especially in the United Kingdom. We will be formally launching a payroll system in the UK first and then Ireland. Our HCM product supports multi country payroll which is a big draw for MNCs," said CEO Virender Aggarwal.
